

Date Code Decipher Method

Emerson Electric

All Emerson Electric motors and the date of their manufacture are identified by the following method. The identification information will be on the motor nameplate or stamped on the bearing cap. In either location the manufacturing date will be shown in the area marked as:

"Mfg. No."

The manufacturer number consists of one letter and three or four numbers.

- Example: G11 7**
1. The letter "A" - "M" represent the Month of Manufacture.
 2. The following two numbers represent the Year of Manufacture.
 3. The final number is used for production purposes only and represents the particular Emerson Manufacturing Facility.
